

DUnAs

University of Aveiro
Research Data Repository

universidade de aveiro
theoria poiesis praxis

Mission

DUnAs has the mission of giving to the UA's research community an open repository for the archiving and publishing of investigation data that support the scientific research

Goals

- a. Give to the UA's scientific community a platform for the archive, dissemination and curation of scientific data, with the purpose of promoting its dissemination.
 - b. Grant the research and retrieval of the data archived in the repository.
 - c. Comply with the requirements of funding agencies, namely the European Commission and the Foundation for Science and Technology.
 - d. Support Open Science initiatives at a National and European level.
 - e. Make the data resulting from scientific research activities at the University of Aveiro accessible and reusable.
 - f. Assign a unique identifier (DOI) to each data set, making it easier to quote.
- 

Kick-off

Stage 1

Search for the best solution

Software selection and
exploration (Dataverse)

Collection of national and
international good practices

Stage 2

Stage 2

01

Experiences

Contacts with other
Dataverse user teams

02

Preparation

Good practices for
collecting and
knowing various
scientific domains and
methodologies

03

Pilots

Selection of two pilots

IN BRIEF

IN BRIEF

Final review of a document that is at the base of the implementation of this service:

- FAIR principles;
- DOI;
- Structure;
- Security;
- Storage;
- Conditions of access;
- Roles and responsibilities;
- Terms of deposit;
- Deposit criteria;
- Metadata;
- Format of files;
- Sensible data;
- Deposit workflow;
- Curation;
- Access;
- Copyright;
- Citations;
- Quality;
- Scalability;
- Sustainability;
- Helpdesk.
